

## EMERGENCY RESPONSE SYSTEM

# PROCARE 1000

Dukane knows that communication is critical in every type of healthcare environment. This knowledge is why we design, manufacture and test the ProCare 1000 Emergency Response System with the same commitment to quality that governs all of Dukane's ProCare System solutions. Whether your need is for long term care, acute care, or clinic/room status communication, ProCare 1000 can be configured and installed to meet your specific requirements.

### Features

The ProCare 1000's updated design benefits from Dukane's over half a century of experience in helping healthcare facilities with their communication needs. High-quality components including patient and resident stations, lavatory stations, corridor lights, and annunciator panels give residents, patients and caregivers alike the same sense of security that they have come to expect from Dukane.

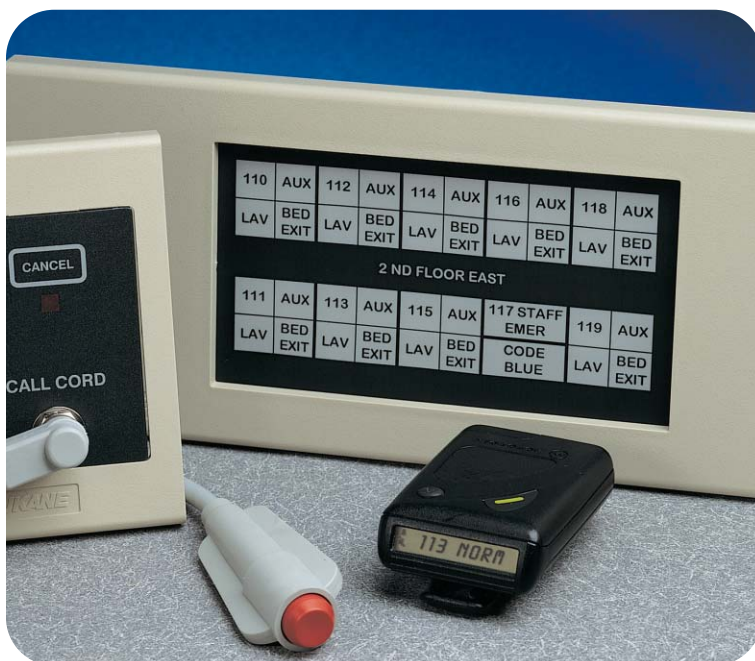

If you're looking for ways to enhance your caregivers' ability to spend more time with patients and residents, ProCare 1000 has the capability to interface with pocket pagers for remote staff notification of resident requests. It can also transmit alarms from patient monitoring equipment, either to the nurse station, to pagers, or both!

Any way you look at it, ProCare 1000 delivers a high quality, flexible and affordable communication solution.

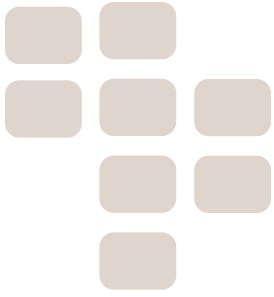

### Value

Dukane's ProCare 1000 delivers the flexible features demanded in a simple emergency response system including quality, reliability, configuration choices, pocket page interface, and an affordable price.

Dukane has provided communication solutions to healthcare facilities for over half a century. Call Dukane or your local authorized distributor to find out how to put ProCare 1000 to work for you.

- **Cost-effective tone and visual communication**
