

AUDIO VISUAL NURSE CALL SYSTEM

PROCARE 2000

Dukane's ProCare 2000 has been selected by thousands of healthcare facilities across North America and around the world as their communication system of choice. Its combination of unique features, optional configurations and high reliability makes its popularity easy to understand.

Features

A full-field master station display, wide variety of call stations, feature options, and multiple configuration choices allow facilities to design ProCare 2000 systems to meet their specific goals and objectives. In fact, separate departments can have their own unique features that will deliver the appropriate enabling technologies to each area's caregiving staff.

Options

Selected ProCare 2000 options include an unmatched upgrade path to the exciting new ProCare 2600 Solution, Activity Reporting and Management System (ARMS) for response time analysis, and pocket paging interface for remote messaging of staff. All of these modular options offer users the ability to implement the specific system functionality to allow staff to meet their quality of care goals.

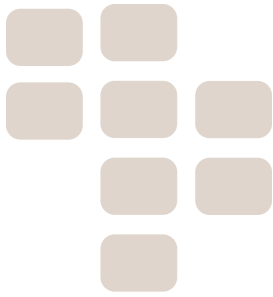

Dukane's ProCare 2000 provides quality, reliability, and flexibility in communications for healthcare facilities. Put it to work for you.

Value

The ProCare 2000's quality design, unique features, and affordable pricing all combine to deliver a system of exceptional value. Facilities all over the world have selected ProCare 2000 knowing that it would provide years of reliable service.

Dukane has been offering market-driven solutions to healthcare facilities for over a half a century. To take advantage of this vast experience, call Dukane or your local authorized distributor for more information on the ProCare 2000.
