

iPhone / iPod touch

The Iwatsu Enterprise Suite further expands its [Mobility](#) application by delivering full unified communications to the Apple iPhone® and iPod touch®. The iPhone® in particular quickly proved itself as a business ready phone, and this further expands the iPhone's® capabilities.

The Mobile UC Client for the iPhone® and iPod touch® is available in the [iTunes® app store](#).

Features

- View personal presence status and change locations on the fly
- Set your status as available or not available to receive calls and instant messages
- Define and select one or more telephone numbers where calls are routed to reach you. This can be an Enterprise Suite extension or external number such as your iPhone® mobile number.
- Search and view the company directory that includes coworkers' availability status
- Instant message coworkers using the secure LanTalk instant messaging application
- Generate SMS messages to other users using the LanTalk instant messaging application
- View incoming and outgoing call histories with call back option
- Make outgoing calls through the Iwatsu Enterprise Suite from the iPhone® or iPod touch®.*
- Create personal groups of often-contacted coworkers for easy access.

*Note that with the iPod touch® calls are initiated through the iPod touch® but are placed from one of your availability numbers
